CORNERSTONE MEDICAL SPECIALTY CENTRE
6025 LAKE ROAD, SUITE 200 • WOODBURY, MN 55125

Vasectomy Reversal Money Back Guarantee

In rare circumstances, a man may undergo a microsurgical vasectomy reversal and not have sperm return to his semen. Since he and his partner likely still want to have children, Minnesota Urology will refund the surgical fee in hopes that this will assist the couple in their ongoing desire to have children through a redo surgery, IVF, or adoption.

- The guarantee applies to men who never attain a sperm count in excess of 1 million sperm within one year of the vasectomy reversal.
- This guarantee ONLY applies to Minnesota Urology fees; not those of any outside entity, including the surgery center or other 3rd parties.
- To qualify for this guarantee, the patient must present for semen analysis at Cornerstone at 6 weeks, and then every three months for the first year.

The reimbursement schedule is based upon the specifics of the case and is as follows:

- | | |
|---|--------------|
| • Less than 3 years since the vasectomy | \$4000 (all) |
| • 3-8 years since vasectomy | \$3500 |
| • 9-14 years since vasectomy | \$1750 |
| • >14 years since vasectomy | \$ 875 |

This schedule applies only to vasectomy reversals performed by Dr. Milbank following scrotal vasectomies (scrotal vasectomies comprise 99% of vasectomies performed).

I understand the terms outlined above, for the money back guarantee, which applies to Minnesota Urology's surgical fee only.
